(54) Title: PLASTIC PHOTOCHROMIC LENS AND METHOD FOR PREPARATION THEREOF

(57) Abstract: Disclosed is a coating composition for a plastic photochromic lens and the plastic photochromic lens coated with the same. The coating composition includes a spiropyran photovisible color compound and/or spirooxazine photovisible color compound dissolved in toluene, and an acryl based binder. The plastic photochromic lens coated with the coating composition has advantages of short variable time, and good adhesion of the coating composition to the plastic lens and UV prevention effect without an undesirable haze phenomenon.
